Ice & Water Barrier

WeatherLock® and Titanium® PSU30 Self-Sealing Ice & Water Barrier products are designed to protect the roof where water has a tendency to collect or flow, including valleys, vents, chimneys and skylights. Ice & water barrier products also help prevent damage from ice damming, when melting and refreezing water can migrate beneath the shingles and lead to premature roof deterioration.

Synthetic Underlayment

Synthetic Underlayment provides a secondary barrier between the wood decking and shingles. Designed to help protect against wind-driven rain that can get beneath the shingle.

Owens Corning® synthetic underlayment products include RhinoRoof® U20, ProArmor®, Deck Defense®, Titanium® UDL25, Titanium® UDL30 and Titanium® UDL50 Synthetic Underlayment.

Owens Corning also offer Fiberglas® Reinforced Felt Underlayment.

BREATHE.

Intake ventilation

When used with the proper exhaust ventilation, Owens Corning® VentSure® intake ventilation products help replace the warm, humid air in your attic with cool, dry air to help protect the interior components of your roof system from heat and moisture damage. They also help keep the attic temperature closer to the outside temperature to help eliminate problems such as ice damming and premature shingle deterioration.

Exhaust ventilation

Owens Corning® exhaust ventilation components such as VentSure® ridge or off-ridge vents help draw air out of the attic, protecting the roofing system from heat and moisture damage. Optimally designed to work together with our VentSure® intake ventilation products, they help create a balanced flow where warm, humid air is continuously replaced by cool, dry air.

DEFEND.

Starter Shingle Products

Owens Corning® Starter Shingle products are the first step in the proper installation of the shingles. They help provide a clean look with a straight edge at the eave and along the rake edge of the roof. The continuous sealant bead on the product provides a seal between the starter and the first row of shingles. Owens Corning® Starter Shingle products help prevent shingle blow-offs and water infiltration in a vulnerable area of the roof.

Shingles

Shingles not only serve as the first layer of defense against the forces of nature, they also help define the character of your home. With innovations such as our patented SureNail® Technology and the multiple granule colors and shadowing used in our TruDefinition® Duration® Shingles, Owens Corning® shingles are designed to bring strength and beauty to your roof.

Hip & Ridge Shingles

Owens Corning offers a variety of styles designed to match and complement our shingles, from the bold look of DecoRidge®^{††}, to the patented performance of SureNail® Technology on DuraRidge®^{††}, to the clean, smooth lines of our ProEdge® Series.^{††}

The most important part of the roof? All of them.

It takes more than just shingles to protect a home. It takes an integrated system of components and layers. The Owens Corning® Total Protection Roofing System^{®^} gives you the assurance that all of your Owens Corning® roofing components are working together to help increase the performance of your roof. Ask your contractor to install a Total Protection Roofing System^{®^}.

Owens Corning® Roofing and your contractor have you covered.

When you have an Owens Corning® Roofing Platinum or Preferred Contractor install your Total Protection Roofing System,[^] you have the opportunity to increase your protection with one of several Owens Corning® Roofing System Limited Warranties,** which extend the coverage of your roofing components and may even provide workmanship coverage.

To find an Owens Corning® Roofing Platinum or Preferred Contractor in your area or to learn more about our Roofing System Limited Warranties** or products, visit www.owenscorning.com/roofing.
